Universal Sample Cutter

CUTS A VARIETY OF MATERIALS

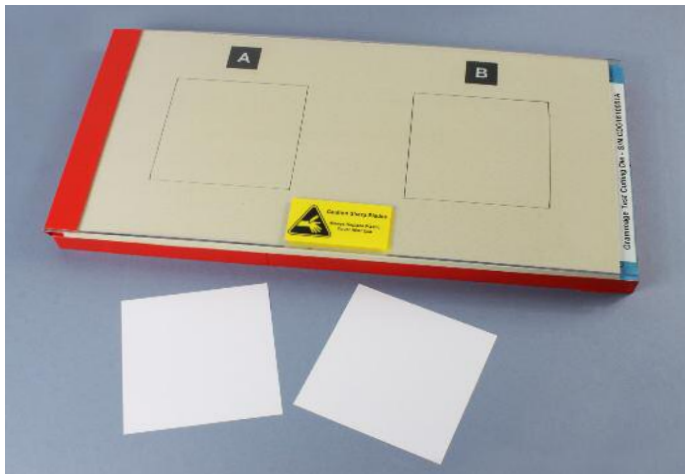

The Hanatek Universal Sample Cutter has been designed for the simple cutting of samples for the packaging laboratory.

FLEXIBLE

Dies can be configured to cut samples for most test types including: friction, tensile, grammage, O₂ permeability, CO₂ permeability, WVTR, rub resistance, carton crease, carton stiffness and many more.

TIME

Save valuable time by preparing multiple samples simultaneously.

COST EFFECTIVE

The Universal Sample Cutter uses interchangeable dies to suit different test types. Simply purchase a new die for the test type required.

SAFETY

Increase operator safety - no knives required.

VARIETY OF SUBSTRATES

Suitable for a variety of substrates including those that are hard to cut with traditional cutters:

- Film, down to 6µm
- Tissue, single or multi layer
- Paper
- Carton board
- Foils
- Laminate

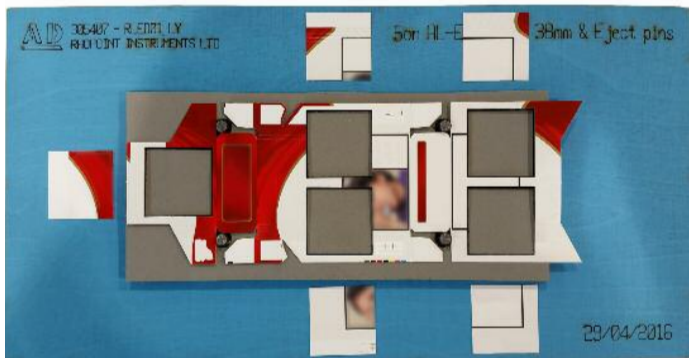

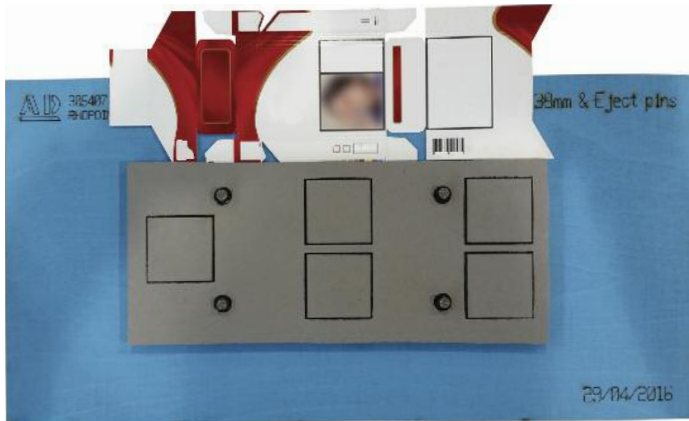

ACCURATE • REPEATABLE • RELIABLE

Samples produced are always to specification independent of operator.

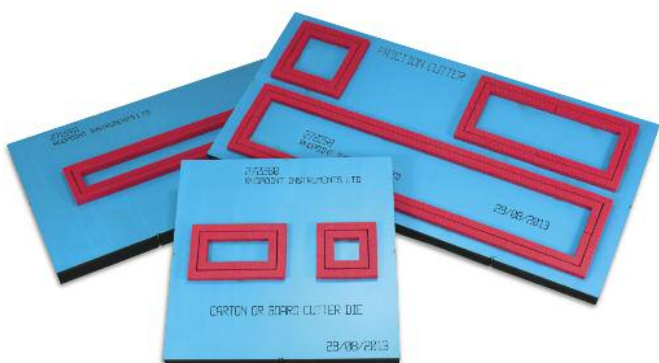

CUSTOM DIES

Dies can be produced for a given pack size

Example shown is a tobacco carton blank which cuts multiple crease samples to BS6965
