Coefficient of Friction Tester Incline Plane

Model: C0045

This instrument is used to determine the coefficient of static friction of most packaging materials by measuring the angle at which one test surface begins to slide against another inclined surface as the incline is increased at a constant and prescribed rate.

As the plane rises at a rate of $1.5^{\circ} \pm 0.5^{\circ}/s$, the first sign of movement from the sled is detected by a micro switch, stopping the plane movement and recording the relevant angle of the incline. The test is frequently referred to as a slide angle. The coefficient of friction is numerically equivalent to the tangent of that angle.

Applications:

- Paper
- Plastics
- Film
- Foil
- Coatings

Features:

- Motor driven
- Standard Sled: 90 x 100mm, 1300g
- Extra Sled: 63.5 x 63.5mm, 200g

Standards:

- ASTM D202
- TAPPI T815
- TAPPI T548

Options:

- Cutting Template - Plane: 130 x 140mm
- Cutting Template - 1300g Sled: 89 x 160mm
- Cutting Template - 200g Sled: 68.5 x 120mm

Connections:

- **Electrical:** 220/240 VAC @ 50 HZ or
110 VAC @ 60 HZ

(please specify when ordering)

Dimensions:

- **H:** 130mm
- **W:** 260mm
- **D:** 210mm
- **Weight:** 5kg

10-11 Colrado Court, Hallam, Victoria 3803 Australia.
